Tree Descriptions

SEEDLINGS & TRANSPLANTS

Blue Spruce-Slow to moderate grower in fertile loams and clays, windbreaks, wildlife and a very popular Christmas tree, blue color varies with nurseries.

Douglas Fir -While Douglas fir can adapt to a wide range of soil types, they grow best in loamy soil that's moist and well-drained. It's ideal to plant Douglas fir in a shady area—part shade or full shade works fine. Serves as a windbreak. The branches slow the speed of the blowing wind

Norway Spruce-Fast grower, does well on well to poorly drained soils, clay and loamy sands, identified by its drooping branches and large cones. windbreaks, timber, pulpwood and wildlife.

Red Pine-Moderate to fast grower, prefers well drained soil, sand, loam, gravel. Windbreaks, timber, pulpwood and wildlife. Much better choice than Austrian Pine. **Michigan Native**

White Pine *Our State Tree!* Slow grower at first but once established grows faster, moist sandy loam, but will grow from swamps and sand, timber, windbreaks, pulpwood and wildlife. **Michigan Native**

White Spruce-Slow to moderate grower in fertile loams and clays, faster when established. Lumber, pulpwood, Christmas trees, wildlife. Deer are not overly fond of these. **Michigan Native**

SHRUBS

Elderberry-Rich moist soil in sunny location, white flowers, purplish-black fruit, Wildlife and wine making. **Michigan Native**

Ninebark-Moist soil, large clusters of white flowers, red fruit, wildlife. **Michigan Native**

Lilac- Common Lilac is a purple colored fragrant flowers in May. Full sun, drought resistant, can be used for screens or windbreaks.

Nannyberry-Moist to well-drained soils, white flowers, blue-black fall fruit, called wild raisin, birds and other wildlife. **Michigan Native**

Witch Hazel-Grow **Native!** Shrub border or large background plant. Can be planted along stream banks and pond edges. Grows best in moist, acidic, rich soil in partial shade. Bright yellow cluster blooms produce a woody brown nut capsule, medicinal uses **Michigan Native.**

Dogwood, Flowering -Dry to moist soils, beautiful white spring flowers, red fruit, birds and small mammals. **Michigan Native**

Winterberry-Also known as **Michigan Holly**, found in moist soils and occasionally drier soils, easy to grow, small white flowers, but look out when it comes to fall its slender branches are covered with small red berries that remain into winter giving color to the landscape, wildlife. **Michigan Native**

DECIDUOUS

Black Walnut-Moderately fast growth in moist sandy loam and silt, intolerant of shade likes open space, not a lawn tree and needs to be planted a distance away from other trees. Nuts are edible for wildlife. The most valuable hardwood in Michigan. **Michigan Native**

Mountain Ash-Grows best in rich moist soils, reach only about 15-25 feet in height with slender trunks, put on a showy floral display in late spring and early summer, flash their bright orange berries in the fall, bird food source, this is not a true ash and is not affected by Emerald Ash Borer. **Michigan Native**

Red Maple-Fast grower in a variety of soils, nice shade tree with beautiful red fall foliage. **Michigan Native**

Sugar Maple-Slow grower in moist to poorly drained fertile soils, hardwood lumber and pulpwood, used for maple sugar. **Michigan Native**

White Oak-Slow grower in all but the wettest soils, food source for grouse, small mammals & whitetail. **Michigan Native**

American Chestnut-These native trees can mature to 80 ft. These are true American chestnut trees from a Northern Michigan seed source that appear resistant to chestnut blight. Great wildlife tree with consistent nut crops. Prefers rich, well-drained soil and full to partial sun.

FRUIT TREES

Honey Crisp Apple semi dwarf 15-20 ft. tall Sweet as honey. Crisp, cream-colored flesh is mild, sweet and aromatic, ripens in early September. Root stock EMLA 111 Semi-dwarf. Pollinator required

Baldwin Apple-Baldwin is one of the best New England apples, and one of the oldest. It is large and conical, with crimson red over a coppery green skin. Its cream-white flesh is crisp and juicy. It is aromatic with a spicy, sweet-tart flavor, and it holds its shape when cooked.

Zester Apple-A high-quality early season variety introduced by university of Minnesota. The fruit is crisp, juicy and somewhat tart. It will keep in common storage for 6 to 8 weeks. The tree is non-vigorous and crops annually.

Pristine Apple-A yellow apple with smooth, glossy skin. Fruit is high in sugar content with very good keeping quality for an early season apple. The tree is vigorous and considered very scab resistant, although some what susceptible to fire blight.

Sugar May Peach-Sweetest peach of its season: mid-June, about one month before Babcock. Very juicy and sweet with fine flavor. High fruit tasting scores. Excellent choice for early season peach. Medium to large size, attractive red skin. Rootstock Lovell. 15-20'.

Anjou Pear-Fruit firm, juicy and with a superbly rich flavor. Best flavor when stored for one or two months. Ripens in August, Excellent keeper. Rootstock OHXF87 Standard

FRUIT TREES CONTINUED...

Regina Sw. Cherry-This sweet cherry tree has a root stock that is a good choice for wet and heavy soils. In order to bear fruit, this tree needs another cherry buddy nearby for pollination. The fruit is firm and split resistant. The fruit is great for fresh eating, pies or canning. This tree is sure to bring in the birds for the birdwatchers.

Danube Tart Cherry-Danube™ is a Hungarian sweet-tart cherry that grows on a large, spreading tree. It blooms early and is slightly less cold hardy than fully tart cherries like Montmorency. SELF FERTILE. Large, burgundy red skin, flesh and juice make this *cherry* wonderful for pies and jams.

Italian Prune-Italian prune plum trees are an excellent choice of plum varietal to grow. Italian prunes can be kept as dwarf trees around 10-12 feet through careful pruning, a very manageable size. They are self-fertile, winter hardy, and the luscious fruit can be eaten fresh, dried, or canned.

Snowdrift Crabapple-A very profuse bloomer that grows to 15-20'. Small to medium size white flowers that are very fragrant Beautiful ornamental tree for yards. Sure to bring in the birds and pollinators.

Goldrich Apricot-An open-pollinated seedling of Perfection. The fruit is medium-size, nearly round. The color of the skin, which is moderately tough and thick, is golden. The flesh is firm and medium-orange in color. Variety is somewhat self-fruitful. Rootstock Seed. Standard 20'

Clare Conservation District always recommends Michigan Native trees and shrubs for best survivability and diverse species to ensure a healthy stand.
